

DEV PATEL

Software Developer

+1 (437) 662-4346 | pateldev878@gmail.com | Toronto, ON | www.pateldev.ca | linkedin.com/in/devpatel878 | github.com/dev1654

PROFESSIONAL SUMMARY

Software Developer with 4+ years of experience delivering scalable web applications and data-driven solutions across the full development lifecycle. Strong background in SQL, Python, and backend data workflows designing data models, building ETL pipelines, and optimizing queries combined with 2.5 years of professional full-stack engineering at Stackss and hands-on machine learning and analytics project work. Information Technology Solutions postgraduate (Humber Polytechnic, 2026) with coursework in Big Data, Data Analytics, SQL Server, and Machine Learning; adept at translating business requirements into reliable, high-quality technical outcomes.

TECHNICAL SKILLS

Languages: SQL, Python, JavaScript (ES6+), TypeScript, Java, Kotlin, HTML5, CSS3

Data Engineering & Analytics: SQL Server, PostgreSQL, MongoDB, Redis, Apache Spark (PySpark), Pandas, NumPy, ETL / Data Pipelines, Data Modeling, Data Warehousing, Data Quality Checks

BI & Visualization: Power BI, Tableau, Dashboard Design & Optimization, KPI Reporting, Excel

Backend & APIs: Node.js, Express.js, FastAPI, Fastify, Spring Boot, REST APIs, WebSockets, JWT

Frontend: React.js, Next.js, React Native, Angular, Redux Toolkit, Tailwind CSS

AI & ML: PyTorch, Transfer Learning (EfficientNet-B0, ResNet18), CNNs, Grad-CAM, HuggingFace, Claude API

Cloud & DevOps: Azure (VM, Blob Storage, Functions), AWS (EC2, S3, Lambda), Docker, GitHub Actions, CI/CD, Git, Vercel, Render

Practices: Agile/Scrum, SDLC, Code Reviews, Unit & API Testing (Jest, JUnit, Postman), Technical Documentation, Stakeholder Communication, Requirements Analysis

EXPERIENCE

Team Lead / Full Stack Developer | Giftelle — HrxConnect Capstone

Jan 2026 – Apr 2026

Toronto, ON | Humber Polytechnic

- Led a 4-person team delivering a cross-platform product: vendor analytics dashboard (React, Vite) and customer mobile app (React Native, Expo) on a Supabase (PostgreSQL) backend.
- Designed the relational data model and SQL queries powering vendor reporting views, and coordinated auth migration, Stripe integration, and release testing for production deployment.
- Ran weekly sprint planning, task breakdowns, and code reviews; managed the Git branching workflow and resolved integration blockers to keep the team on schedule.

Full Stack Developer (Permanent Full-Time) | Stackss

Aug 2022 – Jun 2024

Ahmedabad, India

- Owned end-to-end delivery of scalable web applications and data-backed features, from requirements and system design through production deployment, cutting average delivery time by 20%.
- Designed and optimized RESTful APIs, SQL and MongoDB schemas, and data access layers, reducing average query response times by 30% under growing user load.
- Built automated data workflows in Python and Node.js to source, clean, transform, and validate data from third-party APIs into application databases, with quality checks that reduced data errors reaching production.
- Developed client-facing reporting modules and interactive dashboards surfacing operational KPIs, enabling stakeholders to track performance without manual spreadsheet work.
- Implemented automated testing and CI/CD pipelines, reducing production bugs by 40% and streamlining release cycles.
- Mentored interns and junior developers on best practices, code reviews, and debugging; collaborated with product, design, and QA in Agile sprints.

Full Stack Developer Intern | Stackss

Jan 2022 – Jul 2022

Ahmedabad, India

- Built and shipped MERN-stack web applications for client digital transformation products across the full development lifecycle.
- Designed RESTful APIs with third-party integrations, developed React UI components, and performed rigorous API testing and documentation in Postman.
- Explored and recommended emerging web technologies to optimize project architecture and development workflows, several of which were adopted by the team.

PROJECTS

NeuroScan — AI Brain Tumor MRI Classifier

2026

- Built an end-to-end ML pipeline in Python: sourced and preprocessed 7,200 MRI images, then trained and benchmarked EfficientNet-B0, ResNet18, and a custom CNN, reaching 98.31% accuracy from an 81.62% baseline through transfer learning fine-tuning.
- Added Grad-CAM explainability visualizations so predictions can be verified against tumor regions, and evaluated models with confusion matrices and per-class metrics.
- Deployed the FastAPI inference backend in Docker on HuggingFace Spaces with a React frontend on Vercel, serving live predictions in production.

ExamLock — Secure Online Examination Platform

2026

- Engineered a cross-platform monorepo React web app, Fastify REST API, Electron lockdown desktop shell, and React Native mobile app on a shared PostgreSQL + Prisma backend.
- Integrated Monaco Editor for in-exam coding across 18+ languages, Judge0 CE execution engine supporting 60+ languages, and Socket.io real-time sync with auto-save every 30 seconds.
- Built a Claude API grading assistant generating per-question hints for professors; the Electron shell disables OS shortcuts and logs tab-switch events for exam integrity.

VMS — Vehicle Management System

2025 – 2026

- Developed a full-stack garage management platform: Spring Boot 3.5 REST API with a React + TypeScript SPA spanning 8 modules, including scheduling, inventory alerts, and PDF invoice generation.
- Implemented JWT authentication with role-based access control (Admin, Mechanic, Receptionist), audit logging, and Swagger API documentation over a PostgreSQL database.
- Automated builds and deployments with GitHub Actions CI/CD pipelines and Docker.

IndiEstate — Real Estate Marketplace

2024 – 2025

- Built a MERN real estate marketplace with Google OAuth2 + JWT authentication, WhatsApp-style real-time messaging with read receipts, and an EMI calculator.
- Implemented advanced property search with filtering and rate-limiting security; managed state with Redux Toolkit over a MongoDB data layer with Firebase media storage.

ChargeIT — EV Charging Station Locator

2025

- Delivered a live EV charging station discovery platform with a 3-person team using Node.js, Express.js, MongoDB, and Firebase, deployed to production on Render.

ArtFinder — Android Art Discovery App

2026

- Built a native Android app in Kotlin consuming the Art Institute of Chicago API, with search, favorites, Google Maps integration, offline persistence via Room DB, and Firebase authentication.

OTHER EXPERIENCE

Customer Service Manager | Walmart Canada

Jul 2026 – Present

Toronto, ON | Part-Time

- Oversee front-end operations (service desk, self-checkouts, cashier lanes); coach a team of associates, resolve escalated customer concerns, and ensure consistent policy compliance.

Customer Service Desk & Cashier | Walmart Canada

Aug 2025 – Jul 2026

Toronto, ON | Part-Time

- Handled returns, exchanges, and complex inquiries across service desk, self-checkout, and registers; troubleshoot POS and self-checkout hardware while maintaining accuracy during high-volume periods.

EDUCATION

Humber Polytechnic — Postgraduate Diploma, Information Technology Solutions

Sep 2024 – Apr 2026

Toronto, ON

- Coursework: Big Data, Data Analytics, SQL Server, Machine Learning, Advanced Java, Data Structures & Algorithms, Android Development, Web Programming, Operating Systems, Project Management.

Silver Oak University — Bachelor of Computer Applications (BCA)

Aug 2021 – Mar 2024

Ahmedabad, India | CGPA: 8.12 / 10 — First Class Distinction

CERTIFICATIONS

The Complete Full-Stack Web Development Bootcamp — Udemy

Oct 2025

React.js, Node.js, Express.js, MongoDB, PostgreSQL
